

**Spokane County Fire District #5
March 23, 2012 Special Meeting Minutes
District Office/Station 51**

Members Present: Todd Lehman, Gary Pietz and Larry Wendlandt.

Guests: Scott Lynch

Time Meeting Began: 4:00p.m.

Drawings for new truck were presented and discussed. Some of the items discussed:

- Moving the hose reel under the cab
- 2 cross lays instead of 3, this would shorten truck by 12”
- Truck length with rear dump chute would be 35 ft
- Talking with GF - dumping of 1,000gpm per NFPA can only be accomplished with a dump shoot
- Pumping is a gray area; being a FEMA grant we agreed there can be no gray areas
- Roll up doors with a pressure system to keep dust out
- Wireless communication system and a tire monitoring system
- Length on this truck still seems to be an issue; being able to house all of our trucks in our buildings
- Ordering a portable monitor instead of plumbing for a stationary monitor
- Discussed how important it is to stay on our time line

It was decided to make a decision on the truck at the Monday meeting so we could start writing specs.

Minutes taken by Larry Wendlandt, Commissioner SFCD5

The meeting adjourned at 5:05p.m.

Spokane County Fire District 5 Chairman

Spokane County Fire District 5 Commissioner
